Department of Chemistry, Faculty of Science and Literature, Kahramanmaraş Sutcu Imam University, Kahramanmaraş 46100, Turkey

In this study, the extracts of (ethanol or aqua) 18 different plants (*Salvia officinalis*, *Origanum bargylii*, *Hypericum perforatum*, *Juglans*, *Sideritis syriaca*, *Laurus nobilis laurel*, *Ocimum basilicum*, *Thymus serpyllum*, *Linum usitatissimum*, *Lavandula*, *Citrus limonum*, *Viola odorata*, *Myrtus communis*, *Mentha piperita*, *Anthemis nobilis*, *Allium sativum*, *Allium cepa*, *Rhus coriaria*) have been examined against to four bacterias (*Staphylococcus aureus*, *Escherichia coli*, *Candida albicans*, *Pseudomonas aeruginosa*) and four yeasts (*Saccharomyces cerevisiae*, *Candida albicans*, *Escherichia coli*, *Candida crusei*)

In results, all of the plants have good antimicrobial effects against to microorganisms.
